

Dear Hiring Team,

I am a Cyber Security student currently completing a Certificate IV in Cyber Security at TAFE Queensland, with a background in software development and cloud-based systems. I bring over three years of professional experience working with web applications, APIs, databases, and secure development practices across both private and public sector environments.

Also, I spent five years as a Teaching Assistant at the University of Buenos Aires, where I developed strong communication, documentation, and analytical skills, abilities I believe are essential for security analysis, incident reporting, and cross-team collaboration.

I am highly motivated, detail-oriented, and eager to grow as a professional. I am seeking an opportunity where I can contribute my technical background, continue learning, and support the protection of systems and data in a professional environment.

Thank you for your time and consideration. I would welcome the opportunity to further discuss how my skills and mindset could add value to your team.

Kind regards,
Santiago Locatelli
