EDUCATION

- TAFE QUEENSLAND**
2026 - 2027
Certificate IV in Cyber Security
- GREYSTONE COLLEGE**
2024 - 2025
Diploma of Project Management
- UNIVERSITY OF BUENOS AIRES**
2019 - On Hold
Bachelor of Computer Engineering

SKILLS

- Fundamental cyber security principles
- Network fundamentals
- Basic threat analysis & risk identification
- Secure coding principles
- Authentication & authorization concepts
- Linux & Windows fundamentals
- Understanding of cloud security basics

TECHNOLOGIES

- Python, C, C++, Golang, Ruby, C#
- Google Cloud Platform, Azure
- Git, Gitlab, Github
- SQL, PostgreSQL, Oracle, MySQL
- Javascript, React, React Native, Redux, Bootstrap

LANGUAGES

- English: Fluent
- Spanish: Native

WORK EXPERIENCE

Brosoft

03/2023 - 07/2024

Semi Senior Full Stack Developer

- Developed and maintained web applications with a strong focus on system stability, data integrity, and secure coding practices.
- Worked with authentication flows, role-based access control, and API integrations in production environments.

DApps Factory

11/2022 - 03/2023

Junior Full Stack Developer

- Participated in the development and maintenance of blockchain-based applications, gaining theoretical and practical exposure to decentralized systems.
- Worked with backend technologies and cloud services to support scalable and secure systems.

Brosoft

03/2022 - 11/2022

Junior Full Stack Developer

- Developed web-based systems for public sector organizations, including government platforms with sensitive information.
- Implemented features following secure development principles and best practices for data handling.

Tecnología y Desarrollo Informático

04/2021 - 02/2022

Junior Full Stack Developer

- Contributed to the migration of legacy university systems (Oracle Forms) to modern web-based platforms.
- Assisted in analyzing legacy systems to identify weaknesses, improve maintainability, and reduce operational risks.

University of Buenos Aires

08/2019 - 03/2024

Teaching Assistant

- Designed and assessed practical assignments, exams, and learning activities for undergraduate students
- Supported students in understanding algorithms, logical reasoning, and structured problem solving.
- Strengthened communication, analytical thinking, and documentation skills
